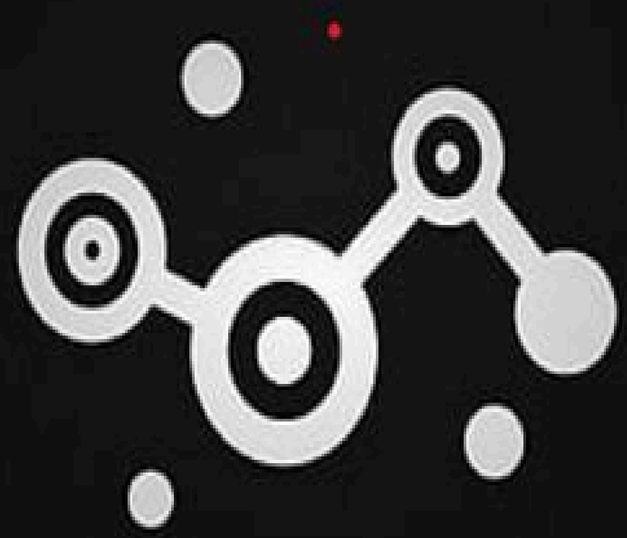
Design guidelines

: Aim to at least meet WCAG 2.1 level AA requirements (Accessible)
Low contrast form field versus high contrast form field (input border)
• Have a logical reason for every design detail
• Secondary text(pargraphs) is less important than headings, so it's made less prominent (using size and contrast) to create a clear visual hierarchy
• Secondary(paragraphs) text line height is at least 1.5 to improve readability
• Minimize interaction cost (clicks, scrolls, typing, reading, searching.. add to
• Keep related actions close
• Reduce distractions, remove unnecessary styles
• Minimize choice (Reduce choices to speed up decisions)
• Remove unnecessary form fields
• Create a clear visual hierarchy to show the level of importance of
• Use conventional design patterns that people are familiar with.
(accordions)
• Reveal less important information gradually (progressive disclosure)
• grouping or categorizing the options to make choices easily)
• Search boxes often suggest common search terms
press, focus, disabled)
• make sure that you're not removing critical information or details (Make sure important content is visible)
Design or sign syster flayen, spacing, typography color, shadow, border

Bitanya

Software Engineer

HI I'm Bitanya from AAiT



About Me

My name is Bitanya, and I am a third-year Software Engineering student at Addis Ababa Institute of Technology (AAiT). With a passion for technology and problem-solving, I am dedicated to honing my skills in software development and design. I enjoy tackling complex challenges and am always eager to learn new programming languages and frameworks. As I continue my studies, I aim to contribute to innovative projects that make a positive impact in the tech industry

Skills

- ***Programming Languages***
  Proficient in languages such as Python, Java, and CSS, enabling the development of efficient and scalable software solutions.
- ***Web Development***
  Experienced in front-end and back-end technologies, including HTML, CSS, and JavaScript, to create dynamic and user-friendly web applications.
- ***Database Management***
  Knowledgeable in SQL and NoSQL databases, allowing for effective data organization, retrieval, and manipulation to support robust pplications.

Education

- ***B.Sc. in Software Engineering***
  Addis Ababa Institute of Technology (AAiT)
  Expected Graduation: 2028
  Currently pursuing a Bachelor's degree in Software Engineering, focusing on advanced programming and software development methodologies.
- ***GDG Summer Bootcamp Certificate***
  Google Developer Groups Completed a summer bootcamp that provided hands-on experience in web and mobile development, enhancing my skills in modern technologies and collaborative projects.
- ***Python Programming Certificate***
  Coursera Completed an online course in Python programming, gaining proficiency in writing efficient code and developing applications using this versatile language.

Hobbies

- ***Coding Projects***
  I enjoy working on personal coding projects that challenge my skills and allow me to experiment with new technologies
- ***Tech Blogging***
  I love sharing my knowledge and experiences through tech blogging, where I discuss programming concepts, tools, and industry trends.
- ***Participating in Hackathons***
  I actively participate in hackathons, collaborating with peers to create innovative solutions and learn from diverse perspectives.
